The subject of most of this book is the quantum mechanics of systems which have a small number of degrees of freedom. This book is a mix of descriptions of quantum mechanics itself, the general properties of systems described by quantum mechanics, and general techniques for describing their behavior.

If a someone is to help you understand FRACTAL FIELDS- centripetal life force and biologic rejuvenation (commercial proof it works: theraphi.net)- you will definitely need a scientist who knows why an object falls to the ground (thus excluding Einstein and Stephen Hawkins).
